

# Advanced Open Water Diver

## Looking for the ultimate adventure?

You found it! PADI's Adventures In Diving program fine-tunes your dive skills and allows you to explore all that diving has to offer.

The Adventures In Diving program offers both the Adventure Diver (3 dives) and Advanced Open Water Diver (5 dives) certifications.

Unlike the Open Water Course, the Advanced Course stresses practical application rather than theory. This means only one pool session and five open water dives.

**Recommended Course Hours:** 15

**Open Water Training:** 5 dives over 2 days

PADI's Advanced Open Water Diver program has something for everyone. This inwater, performance-based program includes dives from the following based on where you do your dives:

- Peak Performance Buoyancy
- Underwater Navigator
- Altitude Diver
- Drift Diver
- Multilevel Diver
- Boat Diver
- Deep Diver
- Night Diver
- Dry Suit Diver
- Wreck Diver
- Search and Recovery
- Underwater Naturalist
- Underwater Photographer
- AWARE Fish Identification
- Dive Propulsion Vehicle
- Underwater Videographer

The PADI Adventures In Diving program offers two certification options. Complete any three Adventure Dives to earn the **PADI Adventure Diver** rating.

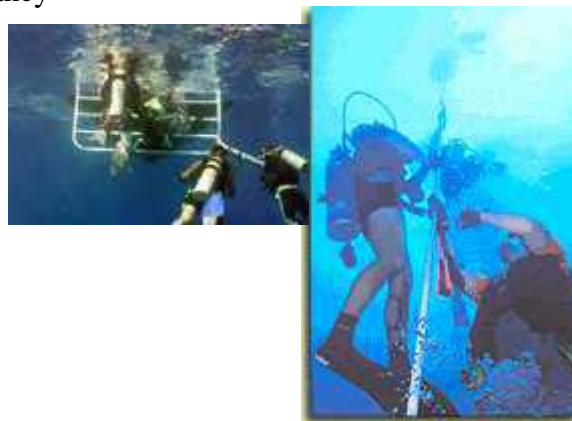

Complete the Deep and Underwater Navigation Adventure Dives and three additional Adventure Dives (five total) and earn a **PADI Advanced Open Water Diver** certification.

Divers between the ages of 12-14 can earn a **Junior Advanced Open Water Diver** rating. The maximum recommended depth for adventure dive is 30 metres/100 feet.

PADI Adventure Divers and Advanced Open Water Divers (15 years of age and older) may participate in PADI Wreck and Deep Diver Specialties.

PADI Advanced Open Water Diver or Junior Advanced Open Water Diver certification lets you continue on to the PADI Rescue Diver or Junior Rescue Diver course. And, provided you meet minimum age requirements for individual courses, you may take PADI Specialties such as Cavern Diver (18 years), Semiclosed Rebreather-Dolphin/Atlantis/Ray (15 years), and Search and Recovery (12 years).

# Course Requirements

## PREREQUISITES

- ◆ 12 years or older
- ◆ PADI Open Water Diver or Junior Open Water Diver or equivalent

What's more, PADI Adventure Dives also count towards PADI Specialty Diver certifications. For example, if you like night diving and want to earn your PADI Night Diver rating, your Night Adventure Dive counts as the first dive of the specialty.

## So what does Adventures In Diving offer you?

New experiences, new skills, lots of diving and thrilling adventures.
